

EASY AS

This week: COURSE HANDICAP

Course Handicap is the number of shots you will receive to play the course from a given set of tees. Before a player starts their round they must convert their Handicap Index into a Course Handicap.

An easy way for a player to remember WHS is to think HCP !

H - Handicap Index

C - Course Handicap

P - Play

Don't worry, you will not be required to do the calculation yourself!

Course & Slope Rating tables will be displayed at each venue for each tee /gender combination that has been rated. Cross reference your Handicap Index on the table to ascertain how many shots you receive, your Course Handicap.
