
World Handicap System - Video resources

The new World Handicap System has been designed to make golf more modern, fun and inclusive. The R&A and the USGA have created nine videos that capture this and break down each key change in a simple to understand manner.

Please find links to all the videos below. They have been uploaded into a YouTube playlist so you can choose to share the videos on your social media channels or embed them on your website in order to communicate the changes to golfers at your club.

The videos work best as a sequence and we have put them in an order which we think will make the best sense for you and your members. They are also a good resource for you to distribute to your colleagues to explain the World Handicap System in a simple manner.

You can view each video individually by clicking the link below or you can view the full playlist at the bottom of this email:

[Introduction](#)

[Basis of calculation](#)

[Course and slope rating](#)

[Playing handicap](#)

[Maximum handicap index 54](#)
